

What is Drive iQ PRO?

Drive iQ PRO is THE way to learn to drive. This revolutionary course merges conventional driving tuition with the world's best software and vital post-test elements. On completion of Drive iQ PRO you also have the option to receive an EdExcel accredited BTEC (level 2) in Driving Science* to add to your CV and additional benefits including insurance.

To enrol, simply book lessons with a Drive iQ PRO accredited coach and they will automatically start teaching you the course. Please contact the coach directly for information and lesson prices, as they will be happy to help you.

How is Drive iQ PRO different to normal driving lessons?

Drive iQ PRO concentrates on what really causes crashes. It is a unit based, self-paced system which focuses on behaviour and attitude, not just the basic skills used to pass a practical test. The final unit is taken post-test and includes motorway and night driving which unlocks the PRO benefits on completion. In addition, you also have unique access to the finest driving software to help you study and test yourself in preparation for your theory test.

What is a Drive iQ PRO Coach?

Drive iQ PRO coaches are forward thinking individuals who are raising professional and educational standards for young drivers. Their commitment focuses on YOU and how you learn as an individual, combined with your thoughts and beliefs as a new driver. Their aim is to not only get you to test standard but give you the best preparation for life on the road.

What are the benefits?

- Various insurance discounts
- BTEC qualification (see below)
- Motorway and night driving (post-test)
- 50% off StreetCar membership (19+)
- Theory + Hazard Perception test prep
- See driveiq.co.uk for latest benefits!

What happens next?

Simply book lessons! If you're just starting out or have only had a few lessons then your Drive iQ PRO Coach will enrol you automatically. When they do you'll receive an email with log-in details so you can access all the free theory and hazard perception training, mock tests and online assessments.

Drive iQ PRO is broken down into 5 Units:

UNIT 1: Driving Skills and Risk

Demonstrate safe car controls:

- Vehicle safety checks, car controls and equipment
- Vehicle controls and instruments and the dangers of ignoring them
- Safety routines, road signs and markings whilst integrating with other road users safely

Explain the key factors in risk management and crash causation:

- Discuss novice driver crash involvement
- Eye scanning methodology

UNIT 2: Safe Interaction with Other Road Users

Manage risk in driving:

- Impairments and driver overload
- Identify impairments which affect risk management
- Helping those involved in an accident or crash

Understand the relationship between effective journey planning and carrying out safe manoeuvres:

- Manoeuvres and journey planning

UNIT 3: Environmental Driving

Understand the effect driving has on the environment:

- The importance of vehicle maintenance in reducing environmental impact
- Sustainable forms of transport

Demonstrate an ability to drive in a fuel efficient manner:

- Drive proactively and economically whilst searching for and dealing with potential hazards

UNIT 4: Driving Responsibilities

Demonstrate knowledge and understanding that human factors will impact on the driving task on every single journey:

- Impairments that have an adverse effect on driver behaviour
- Drive to an unprompted level
- Managing peer pressure
- Dealing with emergency vehicles safely

Know the responsibilities of full licence acquisition and vehicle ownership:

- List the responsibilities of owning a car

UNIT 5: Safe Driving Behaviour (post-test module)

Drive independently in a variety of road, weather and traffic conditions:

- Impacts of weather conditions on driving style and safety margins
- Drive safely at night, on rural roads and on motorways
- Plan and carry out an economical route

Self-evaluate, identifying how behaviour might increase the risk of being involved in a crash:

- Continued self-assessment and evaluation
- Journey planning and alternatives to driving at busy times
- Issues that make you a statistical risk
